

Deliverables in CIS

How to submit a deliverable in the Contract Information System (CIS)

Deliverables are tracked through the Contract Information System (CIS):

- What is a deliverable?
 - Deliverables are objectively measurable products or services that are a direct result of a project effort or procurement
 - Deliverables must be stated as an integral part of the proposal and award documents
 - In the contract award document, deliverables are listed under the Contract Deliverables Requirements List (CDRL)
- How are deliverables managed?
 - Deliverables are established in the OSP Contract Management System (CMS) by contracting officers (COs)
 - The deliverable information is then fed into CIS for processing and viewing
 - The Project Director/Principle Investigator (PD/PI) is required to submit deliverable reports to the CIS deliverable system.

Understanding Deliverable List Headings in CIS:

Note: Deliverables sorted on 'Due Date to Sponsor' column

Unique ID assigned by CIS, use when referencing a Deliverable to a GTRI CO

Due Date

Date submitted and approved in CIS

Y or N if satisfied or not satisfied

CDRL description, should match contract

Timeframe the deliverable encompasses

If multiple copies are required

Terminology:

- DUE DATE – The due date is the date the deliverable is due to the sponsor. Review and compare to mail date.
- MAIL DATES – The mail date is the date the PD/PI submitted the deliverable report to the CIS system. The Deliverable/Closeout Team member (OSP) will review the comments for specific remarks that will indicate if the mail date needs to be changed to the due date.
- ATTACHMENTS – Deliverable reports are attached upon submission to the CIS system.
- APPROVALS – The PD/PI has the authority to assign an approver for each project. Once a deliverable is submitted for approval, the deliverable status will be reflected in the Satisfied column of the Deliverable List.
